

Achieve your business goals with SolveIT's
suite of solutions

We design and deliver solutions that perform. SolveIT has a proven track record in designing and implementing solutions that produce quantifiable business results for our customers. With SolveIT as your technology provider, you get a flexible business partner with a proven track record that patiently listens to your business objectives and develop highly customized applications that would cater to your needs. SolveIT has the experience and expertise to cater to both small and medium enterprises and large enterprise-level companies.

Our clients leverage their technology R & D by utilizing our huge investments in highly specialized software solutions. We evaluate modern and emerging technologies on an on-going basis and help our clients make the right choices that would suit their unique business needs.

We offer the following solutions to our clients:

- CustomView™
- Microsoft Sharepoint
- System Integration
- Migration
- E-learning and Multimedia

CustomView™:

A proprietary framework software developed by SolveIT to provide companies with a touch of interactivity to their stagnant web-sites and enhance existing e-commerce sales.

Microsoft Sharepoint:

The latest trend in the technology world, this software lets you set up intranet sites and websites and create shared project portals called workspaces. Within workspaces, you can store documents, contacts, calendars, and chat-like discussions for workgroup use. SolveIT has the domain experience necessary to develop and implement Sharepoint solutions to suit your needs.

System Integration:

Developing software solutions that build business results is SolveIT's strong forte. We mesh your existing technologies with highly-sophisticated, robust solutions that we have developed in order to fulfill your business objectives.

Migration:

Moving from your legacy system to a highly-specialized solution is always a challenge. With SolveIT, we focus on your priorities and provide a thorough analysis of your existing system and facilitate a seamless transition to a more robust application that would achieve your business goals.

E-learning and Multimedia:

Training at will. That's what SolveIT's suite of e-learning applications will do to your existing training methodologies. Our interactive and user friendly applications will make your training modules exciting and refreshing.

Salient Features of SolveIT suite of solutions:

- Produce measurable ROI that's consistent with your business objectives.
- Highly customizable to suit your industry's needs.
- Stay abreast of emerging technologies and upgrade yourself.
- Help you to maintain your competitive edge in the market.
- Seamlessly integration to your existing application.
